The module

The module **Fileshelf - Downloads** shows downloads in a module position. Create it under **Content → Site Modules → New → Fileshelf - Downloads**.

Settings

Setting	Meaning
Show	Latest downloads, Most downloaded, Downloads of a category or Featured downloads
Categories	Only downloads of these categories (main or additional). Required for “Downloads of a category”, optional otherwise.
Number of Downloads	At most this many entries (up to 100)
Display	List or cards
Title Heading	Heading level of the download titles, one below the module title
File Type and Size, Date, Downloads Count	Show, hide or as in the Fileshelf options

The module uses the same access check as the category view: locked downloads appear with a lock. It uses Joomla's module cache; the cache distinguishes access levels, language and unlocked passwords, so that nobody gets another visitor's view.
